BINDING

 · assent: sovereign assent · subject: vjs-v2-invariants

Invariants are deterministic, typed, evaluated mechanically using fixed predicate registry.

Invariants are deterministic, typed, and evaluated mechanically.

DIRECTIVE	ACTOR	MUST
D1	agent	evaluate invariants mechanically
D2	agent	use predicate dsl

FORBIDDEN
use llm to evaluate invariant
use cosine for invariant
use free form script for invariant

Invariants are evaluated by a fixed predicate registry in Rust. No LLM checks, no cosine similarity, no free-form scripts.
