

Institutions and Repos House (The Order)

ORDER PC

[2026] VJS-PC 5 · 9 June 2026

BINDING · assent: standing bounded assent · subject: governance.institutions-and-repos-house

3-0 Privy Council ruling on Repos House as declarative registry and institutional model.

V2 Privy Council, 3-0 on substance. Repos House is retained as a lightweight, declarative, non-sovereign jurisdiction registry and certification ledger: registration creates no legal force (local sovereign invocation and the lawpack lock do); it decides no merits; it has two layers (private operational in-repo; public system-data-only); registration is optional unless a repo federates, publishes to the Gazette, or claims canonical status; and certification is a restatement of deterministic kernel/gate output (local_ci, hooks, boundary scan, permit gate), never a human attestation or office judgment. Repos House extends, does not supersede, REG-REPOS-REGISTER-001 (2-1; Devereux J would consolidate by naming). MoJ and MBES are dropped as mandatory institutions, paths, or runtime packaging; their functions are carried forward as Court Registry plus Gazette Clerk (clerical only) and Toolchain Registry plus Skills/Agent Registry (derived, pointer-only), with policy arms becoming a Policy Proposal record type routed by the existing kernel lawmaking route (no new office), and V1 ministry names as archive lineage and optional ceremonial aliases with no legal, path, or kernel effect. The institutional model is settled by this ruling (no DEC-INSTITUTIONS-001, 2-1); REG-REPOS-HOUSE-001 is drafted now under Framework Act s.7 and sequenced after permit enforcement and the lawmaking route (Repos House is not the critical path).

DIRECTIVE	ACTOR	MUST
D1	agent	treat repos house as declarative certification is restatement of kernel output not attestation
D2	agent	carry moj and mbes functions as registries and roles not ministries
D3	agent	route a policy proposal through the existing lawmaking route not a new office
D4	standing_committee	draft reg repos house 001 under s7 extending reg repos register 001 build sequenced after permit enforcement

FORBIDDEN

repos house or any office conferring or deciding legal force boundness validity or canonicity
publishing private repo facts in the public register
requiring a ministry or v1 v2 tree layout or giving v1 names legal or path effect

human attestation of a certification field that must be a kernel output

*Repos House is a declarative, non-sovereign, two-layer jurisdiction registry; certification restates deterministic kernel output, never an attestation; invocation binds, the registry only records; it extends **REG-REPOS-REGISTER-001**. MoJ/MBES are carried forward as Court Registry + Gazette Clerk and Toolchain + Skills/Agent Registry; policy arms become Policy Proposal records routed by the existing lawmaking route; V1 names are no-effect aliases. The model is settled by ruling; **REG-REPOS-HOUSE-001** is drafted now and sequenced after permit enforcement.*
